

Our journey toward sustainability has led the way for our industry for over two decades

2000

- Built our first ENERGY STAR certified homes

2005

- Launched Water Smart homes in Las Vegas
- Offered solar photovoltaic options in California

2007

- Committed to using 100% ENERGY STAR certified appliances

2008

- Published First Annual Sustainability Report
- Committed to building ENERGY STAR certified new homes company-wide

2009

- Launched National Advisory Board to provide external expert guidance to our sustainability efforts
- Committed to building with 100% WaterSense labeled fixtures

2010

- Built our first WaterSense labeled homes
- Built our first Net Zero home

2011

- Built first all-solar communities in California
- Introduced consumer tool, now known Energy Savings Comparison, which shares expected energy performance and utility costs of home designs

2012**2013****2014****2015**

- Achieved national record for most WaterSense labeled and Water Smart homes in industry
- Opened first EPA Indoor airPLUS certified community
- Formalized KB Cares company-wide giving program

2016

- Built 100,000th ENERGY STAR certified new home

2017

- Built 5,000th solar-powered home
- Built first KB Projek® concept home to demonstrate next-generation sustainable home design and technology

2018

- Built demonstration homes with energy storage and greywater recycling systems

2019

- Achieved average 20% increase in energy efficiency in our new homes compared to 2007

2020

- Built 1,000th solar-powered home

2021

- Achieved 45 average HERS score, a year ahead of our 5-year goal
- Built 200,000th ENERGY STAR certified new home, a new milestone and more than any other builder
- Set new industry record by earning an unprecedented 30 ENERGY STAR Market Leader Awards
- Built first Wildfire Prepared new homes at a new community

2022

- Launched first-ever residential microgrid communities in California
- Committed to building all future communities in Arizona, California and Nevada to WaterSense labeled homes standard
- Reached milestone of \$1 billion in cumulative estimated savings for our homeowners on their utility bills
- Installed our 1,000,000th WaterSense labeled fixture

2023

- Built our 20,000th solar-powered home
- Reached milestone of two billion gallons estimated annual water savings for our homeowners through our water-efficiency initiatives
- Launched a pilot project in Arizona communities using lower carbon building materials

2024
